

AUTODESK®
VIZ
2006

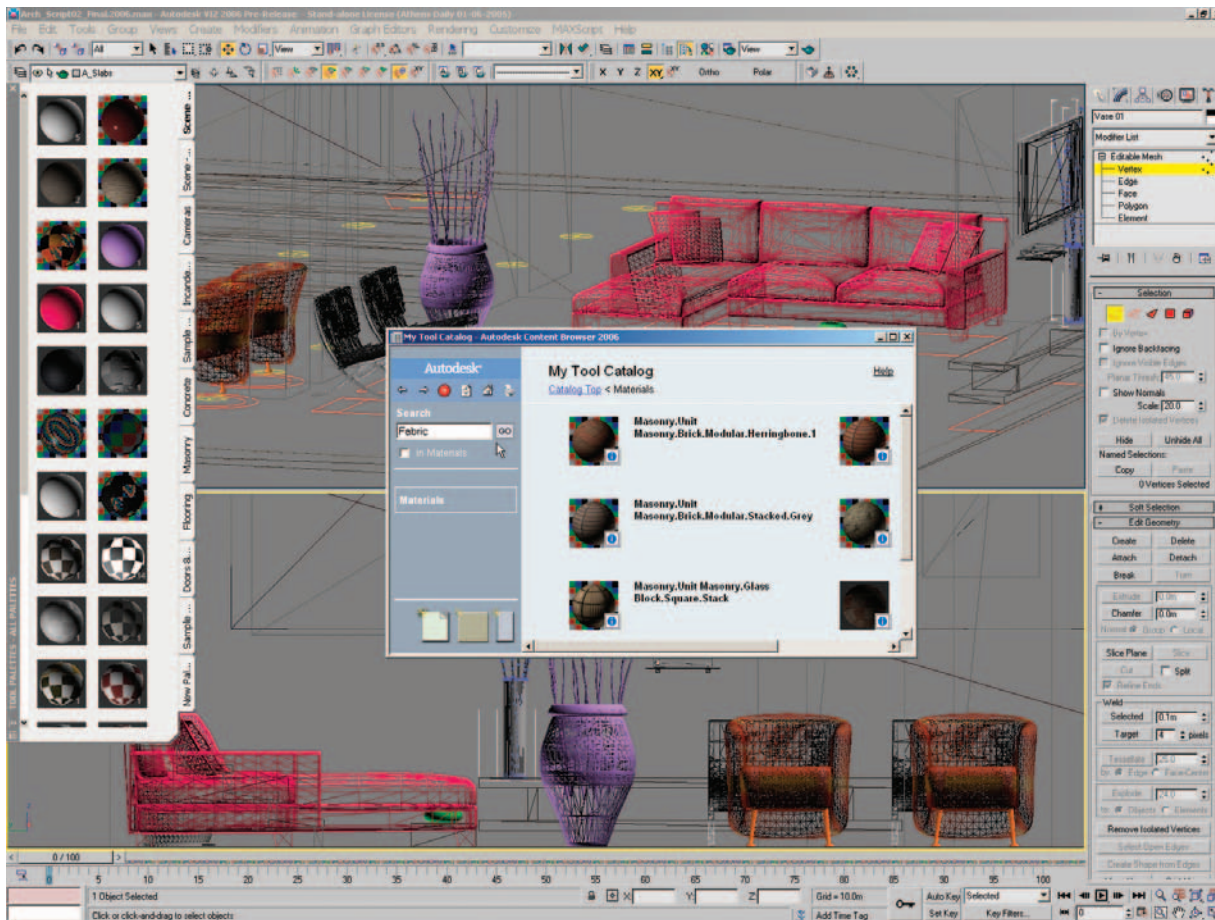

Explore concepts. Drop jaws.

Autodesk®

Your vision, dramatically realized.

Whether you're exploring concepts, validating strategy, or communicating design intent, Autodesk® VIZ 2006 enables you to do it with power, versatility, and stunning realism.

Content Browser
Quickly access design content, such as materials, lights and cameras, with the new Content Browser.

Tool Palettes
Streamline the process of building your scenes by bringing the content that you use every day into one convenient location.

Greater Efficiency
Build your visualizations faster with new features, such as radiosity adaptive subdivision, and quick render presets.

Explore Concepts, Drop Jaws

As projects become costlier and clients more demanding, design visualization becomes even more crucial to your design process. With Autodesk VIZ, you can create anything from quick conceptual studies to the most complex photorealistic renderings. Whether you're studying lighting for a building project, analyzing the layout of a highway interchange, or demonstrating a complex mechanical assembly, Autodesk VIZ is a tool your design process can't afford to be without.

Feature Presentation

Autodesk VIZ 2006 builds on the technological advancements of previous versions, like global illumination and mental ray® rendering technologies, with new tools for creating, managing, and sharing content. Tool palettes and a new Content Browser make the creation process more straightforward than ever. Enhanced data management tools, interoperability with other Autodesk® design applications, and a 3D Autodesk® DWF™ (Design Web Format™) file format exporter mean more efficient production, so you can produce results with maximum impact.
